

# Stylish Interior Timber Doors

Shoji Screens Australia is proud to present its Shoji Doors range. These unique internal timber doors reflect the simplicity and elegance of Japanese interiors, instantly transforming rooms and spaces.

The Shoji Doors range is a response to the popular request for shoji (Japanese sliding screens) in a standard size door that is suitable for Australian homes.

The Shoji Doors range now makes shoji an option for any home.

Design 1 The Kyoto

Design 3 The Fuji

Design 3A The Geisha

Design 4 The Nara

Design 7 The Tokyo

## The Kyoto

The Kyoto is based on traditional Japanese design used for centuries and is still popular today.

## The Fuji

The Fuji is a modest and elegant design. It is one of the best sellers from the range. This design can be applied to any door size more easily than others.

## The Geisha

The Geisha is a glamorous but understated and subtle design. With its modern linear appearance, it appeals to those who appreciate simplicity and calmness.

## The Nara

The Nara is a traditional style door with a twist, revealing a unique beauty.

## The Tokyo

Just as the name implies, this door is modern, sleek and popular. It has wide appeal and fits well in today's new, smarter style of homes.

## Designs and Timber Options

Shoji Doors are available in five standard designs using Australian timbers.

- Tasmanian Oak\*/Victorian Ash\*

Please note that timber is a natural product with variations in grain and colour.

These variations are not considered defects. \*Timber is dependent on availability.

## Lattice Colour Options

As an added bonus the timber lattice strips are pre-finished in a clear lacquer.

## Acrylic Insert

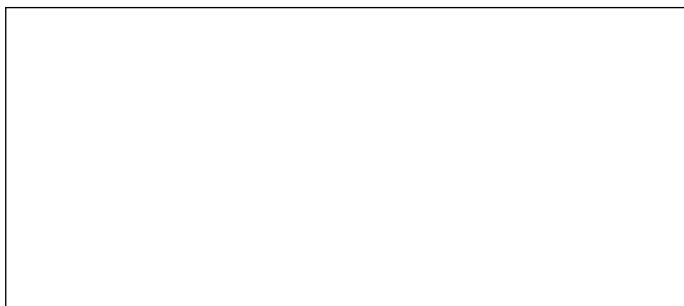

The insert is a 3mm translucent white acrylic sheet. It has a satin finish on both sides and allows light to softly filter through the door. The acrylic is a strong and durable product\* that can be cleaned easily.

## Sizes Available

Shoji Doors are available in various standard sizes. They can be used as hinged or cavity doors. Please note some designs do not suit some smaller sizes.
